everything was cool

Everything is cool

That we will participate in these projects more often

Absolutely nothing

Everything was awesome, food was amazing but they can work a little more for food without milk and meat, because my friend and me were fasting and that was the only thing that could be better.

maybe could improve on time staying here and more often

Everything was great, food was great but on Wednesdays and Fridays fasting food was just ok, in my opinion next time project like this needs more classes and activities because we had so much free time

That we will continue to participate in projects like this and that they will be more frequent. 😊
